PROFILE

The only way to lead a consistent and happy life is through Learning and Implementing them in real life. Learning brings out an opportunity to explore and face new experiences. New experiences include both good and bad where it must be ensured to take good ones and tackle bad ones. With this enthusiasm in me I would assure to work with full dedication and promise to make maximum efforts to accomplish the tasks that are assigned to me.

PROJECT

College Event Management System

Mern stack project

Developed and implemented a comprehensive college event management system using the MERN (MongoDB, Express.js, React.js, Node.js) stack to create a user-friendly platform for efficient event planning and execution.

Donation Management

Frontend with HTML, CSS, JavaScript

Designed and implemented a donation management system using HTML, CSS, and JavaScript. Developed an intuitive user interface for seamless donation tracking and management.

Rock-Paper-Scissors Game

Java application program

A Simple program that lets you play Rock, Paper Scissors game with the computer. Saves High-Score data in file by implementing exception handling concepts.

Resume Portfolio

Frontend with HTML, CSS, JavaScript

Building a personalized resume portfolio website with HTML, CSS, and JavaScript to present my skills and story in an interactive and visually appealing manner.
