- Front end development - Great Learning

PROFILE

Organised and motivated learner eager to apply time management, problem solving, web development skill and critical thinking skills in various environments. Seeking opportunities to expand skills and knowledge while facilitating company's growth.

PROJECT

College Event Management System

Mern stack project

Developed and implemented a comprehensive college event management system using the MERN (MongoDB, Express.js, React.js, Node.js) stack to create a user-friendly platform for efficient event planning and execution. Utilized MongoDB for data storage, Express.js for backend API development, React.js for dynamic frontend views, and Node.js for server-side operations.

Donation Management

Frontend with HTML, CSS, JavaScript

Designed and implemented a donation management system using HTML, CSS, and JavaScript. Developed an intuitive user interface for seamless donation tracking and management.

Rock-Paper-Scissors Game

Java application program

A Simple program that lets you play Rock, Paper Scissors game with the computer. Saves High-Score data in file by implementing exception handling concepts.

INTERNSHIP

- Internship at DGLITZ Tech on Full Stack Development
- Internship at Genuine IT Solution on Mobile App Development
